VIGNARD POLES **ADVANCE PLUS**

Following the specific request for increasingly performing solutions, CMC Pali is able to realize **ADVANCE PLUS** vineyard steel poles, the latest addition to the very wide range already in production.

For each type of poles an additional protective covering, both partial and total, can be applied. The objective is to optimize the "performance" of the underlying material and to guarantee further protection against changing climatic conditions.

A greater guarantee against corrosion to be added to the best mechanical features on the market that confirm, again
once, the continuous search for perfection of CMC Pali products.

100 % MADE IN ITALY

30 YEARS OF DURATION

Purely informative, the manufacturer reserves the right to modify the technical characteristics of the product at any time.
