VIGNARD STEEL POLES **ADVANCE**

The continuous research has led the company to the realization of **ADVANCE** vignard steel poles with zinc magnesium technology, an innovative material that guarantees even longer life in all environments.

Can be made with multiple thicknesses and with any type of post of the wide range of CMC Pali production, you can face without problems all the requests of the modern winegrower.

The times of formation of the first red rust are even 5 times higher than the traditional material.

This type of result, combined with the mechanical solutions of all our vignard posts, guarantees the definitive answer to "palissage" every type of vignard in any weather condition.

100 % MADE IN ITALY

The continuous research has led the company to the realization of ADVANCE vignard steel poles with zinc magnesium technology
